commentary

Primeserv's performance for the interim reporting period to 30 September 2024 continues to reflect the solid growth trend of the past few years. Revenue for the six months increased by 14 percent from R455.0 million to R517.3 million arising in the main from organic growth across the group's client base. Operating margins across the group remained stable despite a tough operating environment, with gross profit increasing by 12 percent from R56.0 million to R62.6 million. Operating expenses during the period increased by 13 percent arising from inflationary pressure and additional costs associated with the further broadening of the group's national infrastructure. Effective working capital management and efficient capital allocation resulted in continuing improvement in the group's cash resources, thereby positively impacting interest income which increased by 32 percent from R2.2 million to R2.9 million for the six months. The group's operating profit improved by 9 percent from R13.1 million to R14.3 million. Net profit before tax increased by 13 percent from R15.1 million to R17.1 million, with attributable income improving by 14 percent from R11.5 million to R13.1 million. Earnings per share increased by 17 percent from 15.02 cents per share to 17.53 cents per share. Headline earnings per share has, similarly, increased by 17 percent from 15.03 cents per share to 17.53 cents per share.

Cash flows from operating activities have shown a significant improvement from R15.9 million to R23.3 million, an increase of 47 percent. Investing activities decreased by 52 percent from an outflow of R9.7 million in the comparable period to R4.7 million for the six months under review. Cash flows relating to financing activities increased by 32 percent from an outflow of R7.3 million in the six months to September 2023 to R9.6 million in the current review period. This is primarily attributable to funds returned to shareholders, in the form of share buybacks and dividends, which together increased by 38 percent from R5.8 million to R8.0 million. Days sales outstanding was 50 days compared to 47 days at the end of September 2023. The group remains ungeared and closed the reporting period with net cash of R75.1 million.

The group's balance sheet reflects a strong group-wide performance with the net asset value per share increasing by 10 percent from 249 cents per share to 273 cents per share at the end of September 2024.

Given the strong financial performance of the group over the six-month period, as outlined above, the interim dividend has been increased by 20 percent to 3.00 cents per share.

The national elections in May and the formation of the government of national unity have lent a certain degree of comfort to the country's macro-economic prospects albeit that these positive signs are still to be meaningfully felt across the economy. The operating environment remains uncertain and erratic across most of the sectors within which the group operates. High unemployment, supply chain constraints, and delayed starts to major capital projects, which the group anticipated participating in, amongst other headwinds, continue to hamper growth. Notwithstanding these tough operating conditions Primeserv's nationwide Integrated Business Support Services' operating units delivered a pleasing performance over the interim reporting period. Each of the group's operating units continued to deliver the distinctive Primeserv brand-driven and client centric-service excellence that meets the specific needs of our clients in an ever-changing business environment. More specifically, the group's specialised operating units providing support services to the logistics and distribution and wholesale and retail sectors continued to experience fluctuating demand, often associated with supply chain related delays beyond their control. The units servicing engineering, construction and manufacturing experienced constrained conditions, while those providing support services to mining and related projects were subject to an uneven business environment during this review period. The training services unit continues to support the group's strategic initiatives while also delivering its niche-based value-added support services to a broad range of clients.

The dramatically changing macro environment in conjunction with the national operating landscape that the group is exposed to remains inherently challenging and uncertain. Despite these conditions the group continues to invest in expanding its reach and capability so as to meet opportunities as they arise, while also seeking out acquisitions aligned to its integrated business support services offering.
